

Dear Mother of God Church,

I pass your church on my way home from work each day and have enjoyed watching all your progress on the building and property. Passing and admiring your church is one of the highlights of my ride home. My house of worship was built in 1788 and is now almost 230 years old. I hope your church and community lasts at least that long and much longer.

Please accept this small gift to your building campaign as a token of the good will of the community around you. I think when we support one another it's good for the world.

Best Wishes to You All!
